

## WP2 Resource State Description

Peter Wittenburg  
27.12.2002

This note describes the state of the resources as far as the members of WP2 know them or as far as it can be anticipated from the intentions of the content providing teams. It is based on an excellent inquiry of U Bern in WP3 and some discussions and email exchanges. A number of question marks remain to be clarified during the coming months. We ask all content providing teams to update this overview whenever possible.
