
DAY 1: Friday, October 27

9.00 Registration and coffee
9.20 Welcome

Brain

9.30-10.15	Jeffrey Zacks (Washington University, St. Louis) <i>Event segmentation and event memory across the lifespan</i>
10.15-11.00	Branka Milivojevic (Donders Institute for Brain, Cognition and Behaviour) <i>Dynamics of hierarchical event networks in the episodic memory system</i>
11.00-11.15	Coffee break
11.15-12.00	Gerry Altmann (University of Connecticut) <i>The challenges of event cognition: Object representation at the interface of episodic and semantic memory</i>
12.00-12.45	Discussant: Peter Hagoort (Donders Institute & Max Planck Institute for Psycholinguistics)
12.45-14.00	Lunch break

Development

14.00-14.45	Anna Papafragou (University of Delaware) <i>Learning to talk about events</i>
14.45-15.05	Lilia Rissman, Amanda Woodward & Susan Goldin-Meadow <i>Linguistic encoding of flexible event construal in adults and children</i>
15.05-15.25	Suzanne Aussems, Katherine Mumford & Sotaro Kita <i>Can prior experience with actions shape children's linguistic representation of action events?</i>
15.25-15.40	Coffee break
15.40-16.25	Sarah Gerson (Cardiff University) <i>Actions, events, and interactions in early development</i>
16.25-17.10	Discussant: Angeliek van Hout (University of Groningen)

DAY 2: Saturday, October 28

Language

9.30-10.15	Christiane von Steutterheim (Heidelberg University) <i>Event unit formation under a cross linguistic perspective</i>
10.15-10.35	Guillermo Montero-Melis <i>Thoughts in motion: Effects of language experience on motion cognition</i>
10.35-10.55	Peter Gärdenfors & Massimo Warglien <i>A two-vector model of events</i>
10.55-11.15	Coffee break
11.15-12.00	Brent Strickland (ENS & Institut Jean Nicod) Intuitive iconicity for events and objects: Telicity and the count/mass distinction across modalities
12.00-13.30	Lunch break
13.30-15.30	Poster session (including coffee)

Language ctd.

15.30-16.15	Yuki Kamide (University of Dundee) <i>Language-space interface: Dynamic spatial representations of motion events in language processing</i>
16.15-17.00	Discussant: Silvia Gennari (University of York)
17.00	Goodbye drinks

Poster presentations

- | | |
|----|---|
| 1 | <i>The impact of conceptual and visual factors on German syntax: Evidence from sentence production</i>
Sabine Reuters, Sarah Dolscheid, Yulia Esaulova & Martina Penke |
| 2 | <i>Granularity effects in event descriptions: a cross-linguistic study</i>
Katerina Stathi |
| 3 | <i>Differences in the production of path terms in highly verbal individuals with autism and typically developing controls</i>
Agata Bochynska, Valentin Vulchanov & Mila Vulchanova |
| 4 | <i>Incremental processing of culmination inferences: a cross-linguistic comparison</i>
Francesca Foppolo, Miguel Santin, Julia Danu & Angeliek van Hout |
| 5 | <i>When you eat from the cake, is it all gone? Structuring events using morphosyntax as a cue</i>
Duygu Özge, Deniz Vidinli, Aylin Küntay & Jesse Snedeker |
| 6 | <i>Grammatical aspect and motion event endpoints in Dutch and Chinese</i>
Yiyun Liao, Monique Flecken, Katinka Dijkstra & Rolf A. Zwaan |
| 7 | <i>The role of L1 and event type in processing aspectual mismatches in L2 English: an ERP study</i>
Norbert Vanek & Leah Roberts |
| 8 | <i>Investigating how anticipation of object states drives event comprehension</i>
Kyra Krass & Gerry Altmann |
| 9 | <i>Participant assignment to thematic roles in Tzeltal: Eye tracking evidence from sentence comprehension in a verb-initial language</i>
Gabriela Garrido, Falk Huettig, Elisabeth Norcliffe, Penelope Brown & Stephen C. Levinson |
| 10 | <i>Does the result justify the means? Verbal and non-verbal memory of resultative events in Mandarin, Dutch and Spanish speakers</i>
Miguel Santín, Ciaria Hobbelink, Angeliek van Hout & Monique Flecken |
| 11 | <i>Establishing a bio-marker of Object-State Competition</i>
Yanina Prystauka, Zachary Ekves & Gerry Altmann |
| 12 | <i>Event Novelty and Task Demands Shape Adults' Attention to Unfolding Activity</i>
Jessica E. Kosie & Dare Baldwin |
-

13	<i>Functional connectivity underlying the processing of object-state change</i> Zachary Ekves, Pedro Paz-Alonso, Nicholas Hindy, Sarah Solomon & Gerry Altmann
14	<i>Behind the scenes of word-learning: objects' attributes and functions as cues for generalisation</i> Ekaterina Tomas, W. Joseph MacInnes & Olga Dragoy
15	<i>Changing brain activity in second language users through perceptual learning</i> Norbert Vanek
16	<i>Specificity at the basic level in events: The case of Maniq verbs of ingestion</i> Ewelina Wnuk
17	<i>Moving beyond Talmy's Typology: The Representation of Boundary-Crossing Caused Motion Events in Turkish</i> Reyhan Furman & Aslı Özyürek
18	<i>First things first: cross-linguistic analyses of event apprehension</i> Muqing Li, Johannes Gerwien & Monique Flecken
19	<i>The interaction of event structure and agentivity. An event-related potential study on German intransitive motion verbs</i> Tim Graf, Markus Philipp, Franziska Kretzschmar & Beatrice Primus
20	<i>The role of sensory and motor simulation during narrative reading: Insights from eye-tracking</i> Marloes Mak & Roel M. Willems
21	<i>Iconicity of linguistic expressions influences visual attention to space: A comparison between signers and speakers.</i> Francie Manhardt, Susanne Brouwer, Beyza Sümer & Asli Özyürek
22	<i>The role of language on spatial representations and event processing: Evidence from similarity-judgement tasks and eye tracking</i> Eva Soroli
23	<i>The virtual reality of events of motion (VROEM)</i> Julia Misersky, David Peeters & Monique Flecken
24	<i>Cross-linguistic effects of speech and gesture production on memory of motion events</i> Marlijn ter Bekke, Ercenur Ünal, Dilay Z. Karadöller & Aslı Özyürek
25	<i>Effects of Delayed Sign Language Exposure on Acquisition of Spatial Event Descriptions</i> Dilay Z. Karadöller, Beyza Sümer & Aslı Özyürek
